

Welcome to
The National Museum
Of
Computing

7th October 2021

i-UG_(UK)

A Day at the Museum

Education • Information • Communication

Affiliated with Common Europe

Mike Ryan
Chairman i-UG

i-UG A Day at the Museum

Welcome

- To i-UG's first exclusively LIVE Conference for over 18 months!!
- To the home of the most famous early computers!
 - (& the world's largest collection of working historic computers)

Whilst we are here at the museum,
let's all not forget what is hot and
being built for us right now...

Power10

i-UG A Day at the Museum

Today's Agenda – At a glance

09:45 - 10:10 - Mike Ryan - Welcome & Intro to the day

10:10 - 10:55 - Paul Tuohy - RPG Tricks & Techniques presentation

10:55 - 11:10 – Break for refreshments in the marquee

11:10 - 11:55 - Adam Bradley - A tale of digital archaeology, adventure, Nazi tax books, and Wiener schnitzel

15:15 - 15:25 - Mike Ryan - Meeting Close & announcement of the Icebreaker Competition winner

15:25 - 17:00 - Free flow tour of the museum at your own pace

Agenda & Evaluation Sheet
T.N.M.O.C. 7th October 2021

Your Name	Company	Email (if you wish to receive notices and reports)
Start Time	Presentation	Start Time End Time Comments (if you wish to provide feedback)
09:45	Welcome & Introduction Mike Ryan - i-UG & i-UG Chairman Mike will introduce you to the day's agenda at this venue.	
10:10	RPG Tricks & Techniques Presented by Paul Tuohy In this updated session, Paul discusses some of his favourite RPG (and embedded SQL) tips and techniques. From the 1% CDF to "NBA" from simple tips to tricky techniques and everything in between!	
10:55	Refreshments - A break for refreshments served in the marquee	
11:10	A Tale of Digital Archaeology, Adventure, Nazi Tax Books, and Wiener Schnitzel Presented by Adam Bradley of the I.A.M.O.C. "On the evening of the 30th of April of 2018, in a small pub somewhere in South Wales, Adam Bradley and Chris Bradshaw finished a long and tiring day's work. They had a 'short' conversation. Chris had a story to tell about a project he had been working on. Adam thought it would be an excellent idea to try and capture the story, and submitted a bid with the author to see if he could do it. What follows is a tale of digital archaeology, adventure, Nazi tax books, and Wiener schnitzel. Join Adam as he takes through the story of how they came to capture 3 IBM mainframes in a single night from off-site to the old before book 16, and how they face the year-long task of restoring them to working order."	
11:55	To the Power of 10 Presented by David Spurway - IBM Power Systems Product Manager IBM Systems Technology Architect and long time supporter of the IUG - will join us to report on the latest information available on the forthcoming Power 10. David will be covering what we can do now, what we will be able to do, and more!	
12:45	Lunch & Networking - A buffet lunch served in the marquee	
13:45	HelpSystems 2021 IBM Marketplace Survey Results Presented by Donnie MacColl of HelpSystems IBM is one of technology's best kept secrets, but even it has not escaped the unprecedented change and challenges of our era. The seventh annual IBM Marketplace Survey from HelpSystems provides a close look at what IBM users are doing on the platform - and how Good 20 has responded. Join Donnie MacColl, Director of IBM Technical Services at HelpSystems, as he reveals the results of the 2021 survey including: - What are the biggest challenges presented by Good 20 and a remote workforce? - Are more organizations adopting IBM on the cloud? - Will cost reduction, sustainability, or AI/ML top the list of most pressing IT concerns? - How does the IBM management team look ahead? - Are there emerging IBM use cases? - How does IBM's AI/ML compare to other vendors?	

Agenda & Evaluations continued over page...

i-UG is Delighted to Introduce: Our TNMOC host

Jacqui Garrad

- TNMOC (Museum Director)

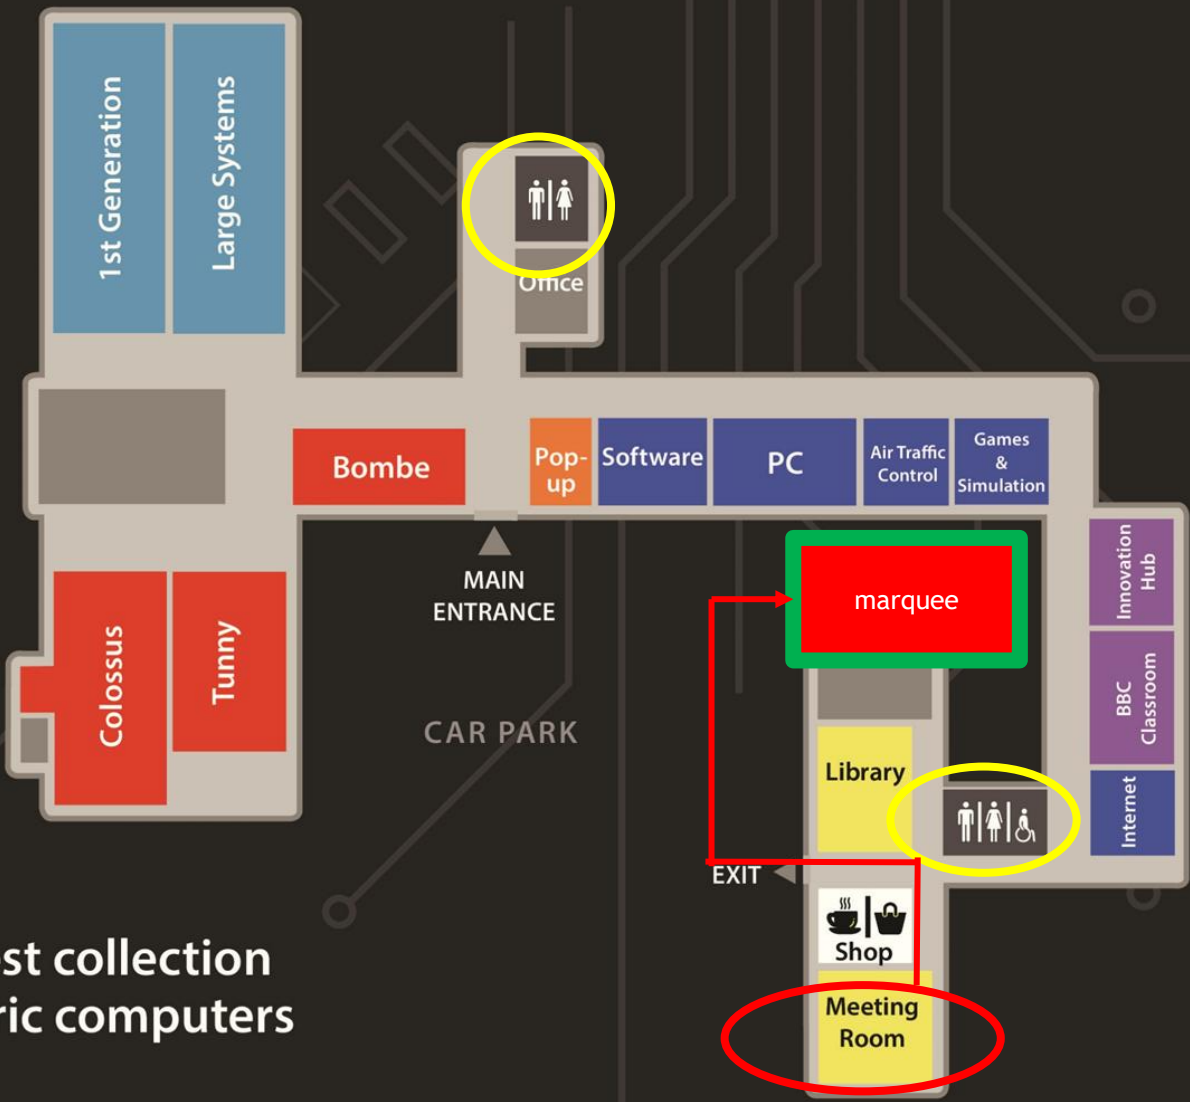

- Icebreaker Competition
- A taster of today's TNMOC presentation
- The tour at the end of the day

i-UG A Day at the Museum

- KEY**
- WARTIME
 - EARLY SYSTEMS
 - POP-UP EXHIBIT
 - PERSONAL COMPUTING
 - EDUCATION ACTIVITIES
 - RESOURCES

The world's largest collection of working historic computers

9:45	Welcome & Introduction Mike Ryan – of EOG & i-UG Chairman Mike will introduce us to the day's agenda at this iconic venue.	Comments (NB these may be used to promote i-UG)
10:10	RPG Tricks & Techniques Presented by Paul Tuohy In this updated session, Paul discusses some of his favourite RPG (and embedded SQL) tips and techniques. From the CTL-OPT to *INLR, from simple tips to tricky techniques and everything in between!	
10:55	Refreshments – A break for tea/coffee served in the marquee	
11:10	A tale of digital archaeology, adventure, Nazi tax books, and Wiener schnitzel Presented by: Alan Bradley of the T.N.M.O.C. "On the evening of the 15th of April of 2019, in a small pub somewhere in Bedfordshire, Adam Bradley and Chris Blackburn stumbled across a listing on German eBay for what was titled a "plant control system". Little did they know that upon inspecting the pictures, they would find what appeared to be an intact IBM 360/20. Having consumed their fair share of libations, the duo thought it would be an excellent idea to try and acquire the system, and submitted a bid with the Auction due to end the following day. What follows is a tale of digital archaeology, adventure, Nazi tax books, and Wiener schnitzel. Join Adam as he talks through the story of how they came to acquire 3 IBM mainframes in one go, got them all back to the UK before Brexit hit, and now face the mammoth task of restoring them to working order".	
12:00	To the Power of 10 Presented by David Spurway - IBM Power Systems Product Manager IBM Systems Technology Architect and long-time supporter of the i-UG - will join us to expand on the latest information available on the astonishing Power 10. David will be covering what we can do now, what we will be able to do... and more!!	
12:45	Lunch & Networking – A buffet Lunch served in the marquee	
13:45	HelpSystems 2021 IBM i Marketplace Survey Results Presented by Donnie MacColl of HelpSystems IBM i is one of technology's best-kept secrets, but even it has not escaped the unprecedented change and challenges of last year. The seventh annual IBM i Marketplace Survey from HelpSystems provides a close look at what IBM i users are doing on this platform—and how Covid-19 has impacted them. Join Donnie MacColl, Director of EMEA Technical Services at HelpSystems, as he reveals the results of the 2021 survey including: <ul style="list-style-type: none"> • What are the biggest challenges presented by Covid-19 and a remote workforce? • Are more organisations adopting IBM i in the cloud? • Will cost reductions, cybersecurity, or HADR top the list of most pressing IT concerns? • What does the IBM i development scene look like? • Are shops expanding their IBM i usage? • How does IBM i's ROI compare to other servers?

Only 7-miles away from the M1 motorway.
146 bedrooms on site
Great Conference facilities
Sponsorship available
Full Expo area

The Gala Dinner is back!!!

2022 – i-UG Marketing Director Update

Steve Cast – Redbourn

2022 – i-UG Marketing Director Update

2020+2021 were unusual years ... to say the least!

But we've had some time to review, reflect and to adjust.

So, for the remainder of 2021 and 2022 our marketing plans include:

- Review our social media partnership to increase value/reach
- Implement a new event registration platform.
- Integrate our mailing list and event signup to our backend system - which runs on IBM i (more to follow).
- Increase the value and frequency of our mailings.
- Plan and run our regular schedule of events; regional and international; in person and hybrid where it is suitable.
- Engage with you all – our valued members!

Thank you for your support.

2022 – i-UG Technical Director Update

Steve Bradshaw (*Brad*) – Rowton

2022 – i-UG Technical Director Update

i-UG^(UK)

Education · Information · Communication

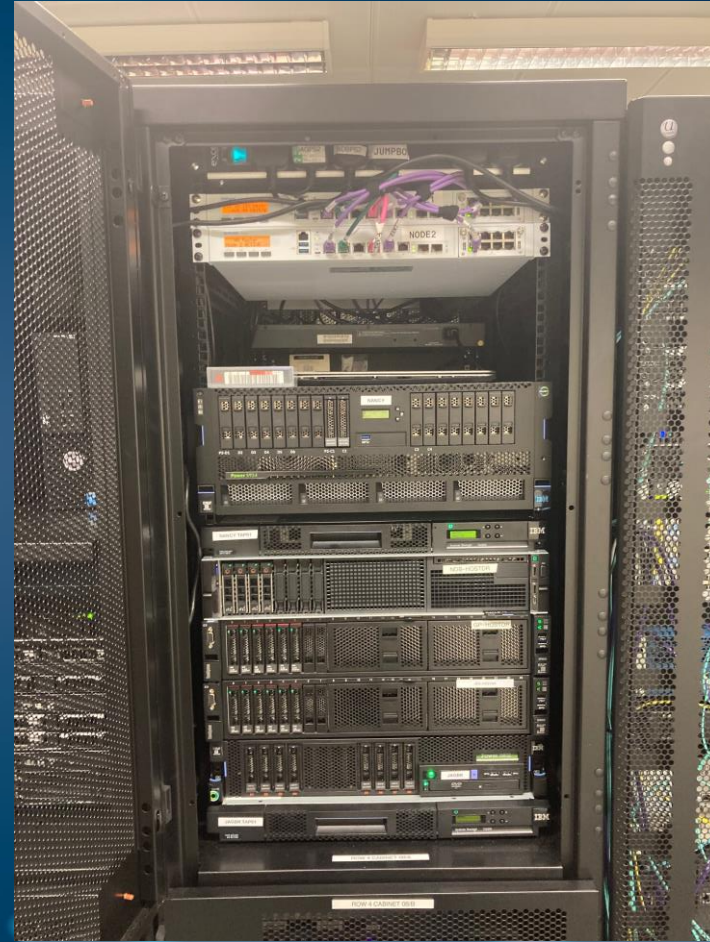

- Practise what we preach
- Our Backend System runs on IBM i
- Power9, 64GB RAM, 3.2TB NVMe
- Or put another way 52,500 CPW
- Shared between 4 x IBM i 7.4 LPARs
 - 2 for i-UG Production & Development

Question?

Would you be interested in using an i-UG Loaner LPAR?

Quick Reminder

Don't forget the Power of CEAC
